PROJECT

- **University Enrollment System:** All the procedures for enrollment of a university have been implemented in this project. During enrollment, while a student selects a course, if there is any limit, then a message will be shown immediately. Option for the teacher(advisor) will also be available to give the manual entry. Besides, this project will generate a list of overlapped courses after pre-enrollment which will be helpful for teachers to make class routine. This project assumes that the routine is not yet completed. The aim of this project is to find those courses having no overlapping students.[\[Source\]](#)
- **Handwritten District Name Recognition System:** In this project, present a customized Convolutional Neural Network (CNN) designed specifically for the recognition of handwritten Bengali district names.[\[Source\]](#)

RESEARCH PAPER
